

# Meaningful **U S E** : CERTIFIED TO SUPPORT YOU

As the most trusted, integrated, enterprise-wide solution for patient education, ExitCare® has received meaningful use (MU) certification as an EHR module under the provisions of the American Recovery and Reinvestment Act (ARRA) in support of eligible providers and physicians primarily within the ambulatory, inpatient, emergency department and critical care settings to achieve specific MU objectives.

## ExitCare Solution

1

**Patient-specific educational resources**  
170.302m

### DESCRIPTION

Enable a user to electronically identify and provide patient-specific education resources according to, at a minimum, the data elements included in the patient's problem list, medication list and laboratory test results as well as provide such resources to the patient.

Over 4,000 documents are cross-referenced by 'diagnoses' for relevance and easy selection based on patient's diagnosis.

Over 2,800 drug-specific information sheets provide patients with complete drug information.

Over 300 documents related to common lab tests to aid in patient understanding.

2

**Electronic copy of discharge instructions**  
170.306e

### DESCRIPTION

Enable a user to create an electronic copy of the discharge instructions for a patient, in human readable format, at the time of discharge on electronic media or through some other electronic means.

ExitCare's 'email-to-patient' feature sends a password protected PDF copy of patient education document(s) electronically to respective patient's email address.

The password is automatically generated, documented, printed and then presented to respective patient at the time of discharge. Other secure options are also available.

3

**Medication reconciliation**  
170.302j

### DESCRIPTION

Enable a user to electronically compare two or more medication lists.

Users can enter data directly into ExitCare or the software can interface with healthcare facility registration and pharmacy systems to receive medication information.

Data can be compared to historical data stored within ExitCare program from prior visits or compared to other medication lists.

For ExitMeds® users.
