

## **New Features of ExitCare® Version 7.6**

### **ExitCare System**

**Updated Archive System** - The new archive User Interface will display separate rows for each of the record types (signature page, prescriptions, patient education, etc.) and will allow for the attachment of a PDF file or scanned image tied to the record type (e.g.: scanned copy of the signed signature page).

**Meaningful USE Certified** - Has also been approved to meet the Meaningful USE criteria. This has been met in three areas; Patient Specific Educational Resources, the ability to provide an Electronic Copy of the Discharge Instructions in a password protected PDF file, and the last area is for Medication Reconciliation.

- To provide the password protected document to the patient, the **Patient Summary Page must be printed and given to the patient.**

**Ability to Export Title List Under Documents by Diagnosis** - Can perform title list export into an Excel spreadsheet under Documents by Diagnosis tab.

**Medication Summary and Patient Summary** - Reduction of verbiage in header on these pages to prevent carryover to second page. Visible fields are: Patient Name, Attending Caregiver Name, Discharge Time and Diagnosis

**For more information, please contact your ExitCare Customer Service Representative at (800) 694-6669, ext. 3.**
