

New Features of ExitCare® Version 7.5

ExitCare System

Administrative Broadcast Messaging – Ability to broadcast “administrative messages” to ExitCare users from within the program.

Patient Lookup Tab/Screen – New Patient Lookup Tab/screen combines “Import Patients” and “Recent Patients” tabs/screens. Back-end still provides for different Import and Recent Patient setups, but they are combined on the front user interface into one window.

Archive System UI Change – New Archive System user interface change. Patient visit records now show separate rows for different functions (forms, Rx’s, patient ed, etc.).

Codes (ICD-9, etc.) Accepted to Create Subset Title List – ICD-9 and other codes can now be passed in HL7 (or Command Line for Partner Customers) to create subset title list on “Diagnosis Tab” on Choose Titles Screen.

Security System, User Grid Additions – Security System User Grid now includes Phone Number and Account Expires fields.

New Handling for Two Users on Same Patient – ExitCare has instituted a Patient Record Locking System that provides a way to handle two or more users accessing the same patient record at the same time. Ask your ExitCare representative for more details on this feature.

New Print Button – “Print, Clear Patient and Minimize” is now an option on Print Screen.

Patient ID and MR #'s, Name Bold - Developed for ExitCare partner customers using command line interface, the Patient ID#, Medical Record #, Patient First and Last Names data will now always show as Black and Bold text

Letter Case Default on Demographic Fields - Letter case default can now be set for Patient Demographic data fields (standard free text; or lower case, UPPER CASE, or Proper Case)

Pick Question Window Now Searchable - The Pick Question window can now be “searched” (used if adding question fields when creating or editing documents)

Continued on Next Page

Date Check for Future Visit - Date check mechanism built in to allow visit date to be entered for visit in the future. NOTE: Issue of discharge date/time being able to be before visit date has yet to be fixed.

Workstation Connection Info Setting – Users can now remove a facility name choice from the list of facilities in cases such as a group of facilities with a combined authorization file which then loses one of the facilities and doesn't want it showing up on the list to pick from.

EULA Updated - EULA (End User License Agreement) Updated.

Email System Change – Emailing no longer requires email client on workstation, but can use email server system. This requires the installation of the ECCS (ExitCare Communication Server), freely available from ExitCare.

ExitMeds System

Dose Level Added - Added Dose level of “3/4 tsp” for liquid meds.

Medication Summary Page with Foreign Language Translations - Additional entries on the Medication Summary page provided with foreign language translations.

Printer Choice Added for Narcotic vs. Non-Narcotic Scripts - Ability to define narcotic and non-narcotic prescription printing jobs to print to different printers.

Medication Summary Page FDA Warnings in All Languages - FDA warning about side effects on the Medication Summary page now in all languages.

Patient Medication Schedule Days of Week in Spanish - PMS days of the week now can appear in Spanish.

Duplicate Drug Checking – ExitMeds now checks for duplicate prescriptions written among both name brands and generic names of drugs.

Edit Notes on Drug Summary - Ability to edit notes from drug summary page.
